Potential conversation about fit

The website describes adult concerns including anxiety, grief, depression, relationship patterns, burnout and life transitions. A consultation should establish fit, scope and whether another level or kind of care is appropriate. Do not assume child, teen or whole-family treatment is available.

Before making a referral

Confirm current availability, fees, exact plan participation, service scope and the appropriate communication process. The initial conversation is a free 15-minute consultation. A request does not establish an appointment or treatment relationship.

Keep the first step client-led where appropriate

Share the practice information with the person seeking care. Exchange clinical details only through an appropriate agreed process with required consent and privacy safeguards. Do not place patient details in general marketing, analytics or resource correction forms.

Review the referral page in the preview. Preview forms do not send or store referrals. Production contact information must be verified before distributing this sheet. This is not crisis care: in the U.S., call/text 988 for crisis support or 911 for immediate emergencies.
